

THE **sinto** PRODUCTS

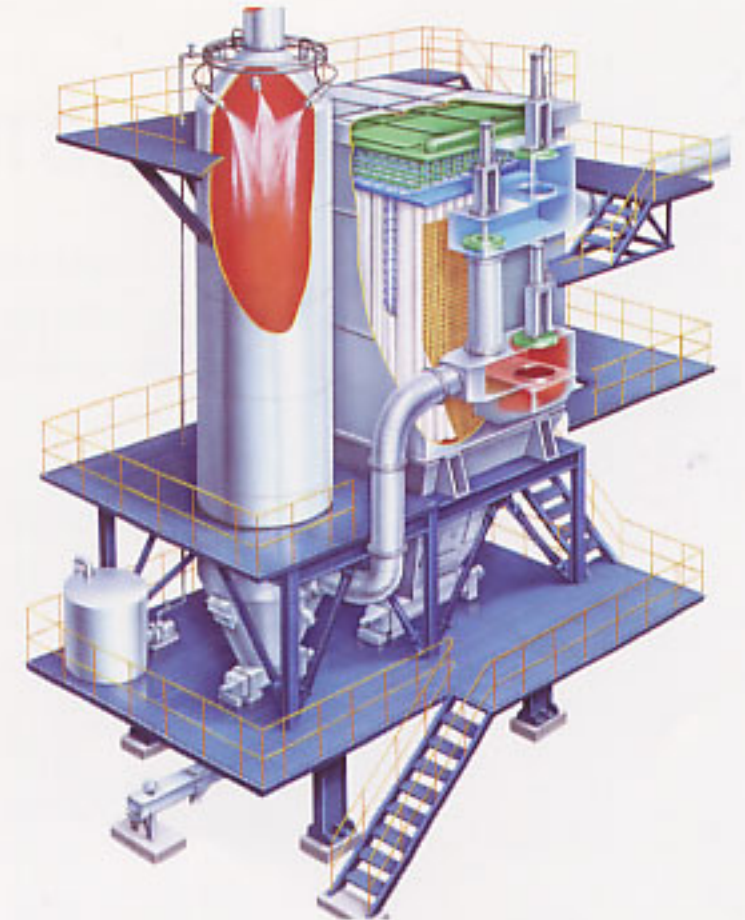

UDC Ultra-Jet Collector Series

- Economical and highly efficient for systems requiring large continuous gas flows.

TDC Dustube Collector Series

- Adaptable to almost any exhaust gas application.
- Economical and reliable.

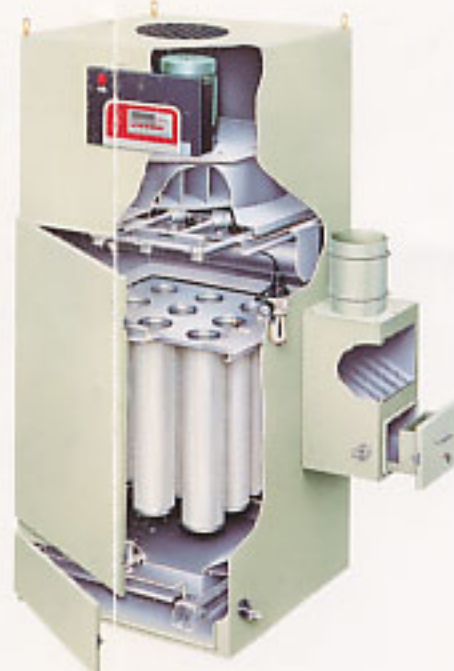

FGC Flue Gas Treatment System

- Cleans most hazardous gases and heavy metals from incinerator and combustor exhaust flows.

FXIII Small Continuous Dust Collector

- Economical and efficient for systems requiring smaller continuous gas flows.

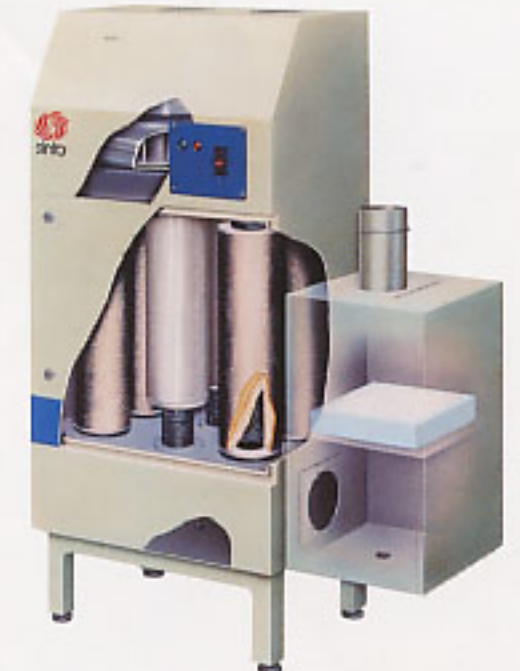

PXIII Fume Collector

- Ultra-jet technology provides high dust collection efficiency for fine fumes.

Small ES Dust Collectors

- Effective on high-density dust contaminations.

MXIII Oil Mist-Collector

- Efficient, low noise operation in a compact design.

Small EXII Dust Collectors

- Easy to use systems are available for many different applications.

Noise Control Devices

- Effectively suppresses a wide variety of noises.

DME Dust Treatment Device

- Consolidates dust for easy disposal.
